

# StentSpect

9.0

When it comes to Inspection, we have the Vision

## Key Features

- Fully automatic non contact inspection and measurement system
- Highly accurate and repeatable machine vision technology
- Measures horizontal, vertical, angular dimensions
- Can identify linear and radial symmetry defects
- Software assisted surface defect identification
- Display unrolled 2D view of stent along with measurement and defects
- Color coded representation of defects
- CFR 21 part 11 compliant
- Automatically stores all data on network server or local computer
- Provides SPC analytical reports and data for process refinement and control
- Graphical reports of SPC analytics

## Specifications

### Measurement capability

- Stent Length : Up to 55 mm
- Stent Diameter : Up to 5 mm (other options available)
- Scans average long length stent in less than 90 seconds  
(nearly 400 inspection points)
