Sahajanand Launches Rough Diamond Planning Machine for Small Goods

"Sahajanand Technologies (P) Ltd, Surat launched Magnus Lite. It is a production oriented diamond planning machine designed for small goods."

Surat, India- February'08 High-tech engineering diamond industry solution provider Sahajanand Technologies, India recently launched its Magnus Lite advanced rough analysis and planning machine, which is targeted to the small goods manufacturers in India.

The Magnus Lite performs laser driven rough cavity mapping, standard and computer-assisted manual planning and laser marking. It generates optimized planning options for small goods. It is supported by the Magnus Rough software application for maximum yield.

A production-oriented machine that can process 1,000 to 1,200 rough stones per day (and 1,500 under laboratory conditions), the system aims to increase yield optimization by up to 10 percent for smaller goods.

Company also maintains product specific website www.magnuslite.co.in.

Company Profile:

Sahajanand Technologies (P) Ltd. is a leading manufacturer and exporter of Laser technology centered capital equipments for diamond manufacturing industry. We present 'Total technology solutions for diamond industry under one roof.' Our product portfolio broadly includes Diamond Measurement Systems, Laser driven Diamond Processing equipments & Auto blocking & Polishing Machines etc. used at different stages of diamond manufacturing process. Please visit our corporate website for more information: www.sahajanand.co.in
