Sahajanand Technologies Unveils 3G Diamond Planning Technology

"Sahajanand Technologies, India launched the third generation (3G) diamond planning machine- The Magnus Pro. It is an advanced version of Magnus series planners with inclusion placement facility that captures inclusions up to VS1 clarity with unmatched ease."

Surat, India - 7th March'08 Sahajanand Technologies, India, the high-tech engineering solution provider for diamond industry recently launched The Magnus Pro, a third generation (3G) planning machine. The machine provides revolutionary All side mapping & advanced inclusion placement facility for accurate detection and right positioning of inclusion.

The Magnus Pro is a uniquely designed planner which gives advanced mapping, inclusion detection (up to VS1), value based planning & ultra modern marking facilities in a single machine.

The Magnus Pro generates complete 3-D model of rough through revolutionary All Side Mapping technology. This is the technology that maps deep cavities on rough diamond's surface as well as top & bottom cavities.

The Magnus Pro comes with an upgraded version of Magnus Rough software. This software edition provides an unmatched ease in placement of smallest & complicated inclusions. More detailed inclusion placement facility is supported by HDCV technology & multi-zone illumination. High Definition Color Vision (HDCV) is powered by digital color camera for most realistic image of rough diamond. The multi-zone illumination allows setting up ideal illumination for best view & position of inclusion in rough. The most reliable fiber laser source is utilized for marking diamonds. More information about this planning machine is available on www.MagnusPro.co.in.

Company Profile:

Sahajanand Technologies is a leading manufacturer and exporter of Laser technology centered capital equipments for diamond manufacturing industry. We present 'Total technology solutions for diamond industry under one roof.' Our product portfolio broadly includes Diamond Planning Machines, Laser driven Diamond Processing equipments & Auto blocking & Polishing Machines etc. used at different stages of diamond manufacturing process. Please visit our corporate website for more information: www.Sahajanand.co.in
