Sahajanand Technologies looks for better customer interaction with new look corporate website

"Sahajanand Technologies launches revamped & comprehensive corporate website. Website with a wealth of information and rich online resources throws an enormous opportunity for customer interaction."

Surat, India – 10th May'08 Sahajanand Technologies, India, the high-tech engineering solution provider for diamond industry unveiled its revamped & comprehensive website (www.Sahajanand.co.in). Sahajanand Technologies firmly believed that an attractive and easy-to-use website is essential to maintain a competitive position nationally and internationally.

The launch of the website strengthens company's corporate philosophy & identity of 'Sahajanand' Brand. The site aesthetics and presentation of information makes the site an essential visit. Site is designed to present the visitor a clear understanding of what company is all about & what company does.

The new features in the website include, Group profile, company's glowing history, latest product details, software updates, up to date corporate happenings, access to company's customer centric resources, online product brochures, access to company Blogs.

Commenting on the new website, Rahul Gaywala, CEO, said "Our new corporate website reinforces our customer centric philosophy. It has always been a medium of customer interaction for us. With this extensive new look we are presenting, our existing as well as potential customers, a clear and intelligible message that we are listening & how we are making a difference to their business with our technology."

Sahajanand Technologies has consistently innovating new ways to interact with clients. Creation of a public interface with usability & functionality has been the key aspect behind development of the new corporate website. Introduction of some rich features like newsletters, downloads, Blogs etc. make the website more dynamic and interactive.
